SunoKitaab, founded in 2019 in Rajasthan, is an education startup addressing the lack of teachers and technology in rural schools. They've developed an innovative offline learning device that delivers school syllabus through podcasts, audio lectures, music, and sound effects. With over 10,000 hours of content created, they aim to empower students with accessible and affordable digital education without the need for the internet or smartphones.

Go Offline with SunoKitaab VidyaBox

Smartphones and Laptops were orignated primarily for Entertainment and Bussiness purposes. We at SunoKitaab are providing EdTech products for both rural & urban India. We cover all boards available in India including CBSE, NCERT, RBSE, WBBSE and many more.

Buy Now   How It Works

Our Story,

SunoKitaab is an education startup that teaches students digitally, without the internet and smartphone at their homes with personal devices
Founded in Villages of Rajasthan in 2019, to bring educational content in the most affordable technology. We are building SunoKitaab, an audio-based offline learning device to bring school syllabus in the form of podcasts and audio lectures, added with Music and sound effects. The device can be updated for next class content with OTA update over our mobile app. We got the idea while working on a rural fellowship in Churu Rajasthan. In schools, students are not able to take classes due to a lack of teachers in schools and lack of technology in their hands. As we have experience in audio production we thought that the audio format of content can be used to teach students. We started creating content in our voice and piloted it. Currently, we are working with more than 150 teachers and created 10000+ hours of content based on the school syllabus.
