

# VISITING NEWS 18 NETWORK

## FOR DEBUTE PROGRAMME

Recently, first-year M.Sc. (Mathematics Education) students from CIC, DU, and Jamia Millia Islamia, had the unique opportunity to visit News 18 Network's debate show on the pressing topic of "caste census." This engaging experience allowed the students to observe firsthand the dynamic environment of live broadcasting while delving into a critical social issue.

As they watched the debate unfold, the students actively participated by asking thought-provoking questions to the panellists, thereby enriching the discussion with their fresh perspectives. Their involvement provided a valuable platform for exploring the nuances of the caste census and its implications on education and social equity.

In addition to engaging in the debate, the students gained practical insights into the functioning of a news reporting set. They learned about the technical aspects of broadcasting, including how cameras operate, the intricacies of recording, and the coordination required for a seamless production. This exposure not only enhanced their understanding of media mechanics but also highlighted the essential role of journalism in shaping public discourse. Overall, the visit was a transformative experience that bridged their academic knowledge with real-world applications, fostering a deeper engagement with both mathematics education and societal issues.

1st Year Students of BATCH 13, M.Sc. (Mathematics Education), CIC, DU & JAMIA MILIA ISLAMIA

PM: वीर सावरकर का अपमान करने वाले माफी नहीं

Raja Ravish "Nishad"

PM: मैंने शिवाजी महाराज की समाधि पर प्रार्थना की

Sparsh Chauhan

PM मोदी: हमारे संस्कार अलग हैं
